Research suggests that poor beverage choices are getting in the way of good eating habits. Here are some tips:

- 1. Enjoy milk with most meals to get the recommended two glasses of milk a day.
- 2. Drink water between meals.
- Choose vegetable juice blends that are low in sodium and fruit juices that are 100% pure juice.
- 4. For more nutrition, serve children chocolate milk instead of pop.
- 5. Add a splash of citrus to flavour plain water.
- 6. Choose lattes (half coffee, half milk) instead of coffee for more nutrition.
- 7. For fewer calories, mix flavoured sweetened beverages and juices with sparkling water.
